Sow at 35-50 grams per m2
20kg covers 600sq/m average

DESCRIPTION

Exceptional Coastal or inland Racecourse grass seed mixture ideal for intense wear or "working the horse". This specific mixture produces a dense, springy sward which enables frequent use of the area with minimal damage.

This seed mixture is perfect for over-seeding early March – late November as a renovation mixture, Creeping Red Fescue Grass will help to improve the root strength and appearance of the turf.

TOP PERFORMING FESCUE Provide a fantastic close knitted bottom sole to the sward, with great soil binding characteristics
